Kevin_ 10/06/2021
Hey Y'all!

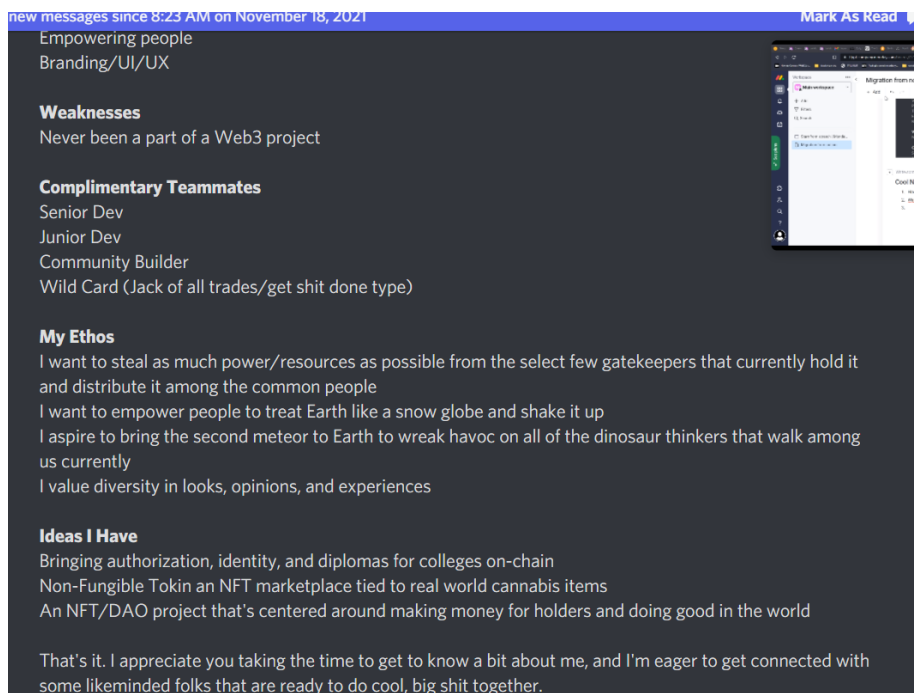

I'm Kevin, based in the Midwest. I'm looking to join a team or find people to jump into a project. Here's a quick rundown on me.

Professional Experience
7 years of marketing experience, including 5.5 owning a marketing agency
Co-founded two B2B service-based businesses that have generated over \$1MM in revenue
Consulted to raise \$10MM in funding for startups (pitch decks/storytelling development)
10 years experience working with developers
Back2Back Crowd Favorite Team at my local Startup Weekend event (My teams have fun, damnit!)

Strengths
Ability to lead a team/follow strong leaders
Vision
Project management
Team building
Empowering people
Branding/UI/UX

Weaknesses
Never been a part of a Web3 project

Complimentary Teammates
Senior Dev
Junior Dev

Empowering people
Branding/UI/UX

Weaknesses
Never been a part of a Web3 project

Complimentary Teammates
Senior Dev
Junior Dev
Community Builder
Wild Card (Jack of all trades/get shit done type)

My Ethos
I want to steal as much power/resources as possible from the select few gatekeepers that currently hold it and distribute it among the common people
I want to empower people to treat Earth like a snow globe and shake it up
I aspire to bring the second meteor to Earth to wreak havoc on all of the dinosaur thinkers that walk among us currently
I value diversity in looks, opinions, and experiences

Ideas I Have
Bringing authorization, identity, and diplomas for colleges on-chain
Non-Fungible Token an NFT marketplace tied to real world cannabis items
An NFT/DAO project that's centered around making money for holders and doing good in the world

That's it. I appreciate you taking the time to get to know a bit about me, and I'm eager to get connected with some likeminded folks that are ready to do cool, big shit together.

Project Description

The cool new system/portal for web3 project management and sidechain for massive events with finite organizer time resources for team building.

MVP

- Users will register to the platform using their wallets, immediately they will mint a NFT badge which is their identifier on the platform.
- The platform will assign each user to a random team on the event. (Chainlink Random numbers)
- Users will vote to select a Team Leader. 🧑 🧑 🧑 🧑 🧑
- The task to complete will be assigned by event admin.
- Teams will work on the event task using pomodoro technique.
- After the task are done, user will earn a ERC20 Token.
- User will be able to use the ERC20 Token to mint a NFT (tradeable on OpenSea).

Scalability phase 1

- Add ability for asynchronous working.
- Add calendar planning
- Allow users to create their own tasks.
- Add Premade teams features, create room id
- Add ability to rate group mates performance.

Scalability phase 2

- Make the user badge NFT to a mutable one.
- Add ability to send own IMG, metadata and features for minted NFTS.
- User can distribute points (tokens) to their teammates.
